1. Introduction

UpBuff Technologies Pvt Ltd is pleased to present this Annual Maintenance Contract (AMC) proposal for the ongoing support and maintenance of the Molygraph website. This proposal outlines the scope of services, response commitments, and commercial terms designed to ensure your website remains secure, stable, and performant throughout the contract period.

The primary objective of this AMC is to provide Molygraph with a dedicated support framework that proactively addresses technical issues, security vulnerabilities, and performance concerns, thereby ensuring uninterrupted online operations and an optimal user experience for your visitors and stakeholders.

2. SCOPE OF SERVICES

This AMC is strictly limited to the support and maintenance of the existing Molygraph website in its current form and functionality. The services covered under this contract are detailed below.

2.1 Technical Support & Bug Fixing

- Identification, diagnosis, and resolution of functional bugs where features or modules are not working as expected
- Troubleshooting and fixing UI/layout issues including broken layouts, styling inconsistencies, and visual rendering problems
- Resolution of performance-related issues such as slow page loads, sluggish response times, and resource bottlenecks
- Fixing logical errors resulting in wrong output, or unexpected application behaviour
- Diagnosis and resolution of runtime errors including application crashes, fatal errors, and unhandled exceptions
- Identifying and correcting syntax-level code issues causing failures or unexpected behaviour
- Troubleshooting data-related issues including incorrect, missing, or corrupted database values
- Fixing broken links, form submission errors, and navigation issues
- Assistance with email deliverability issues originating from the website (contact forms, notifications)

2.2 Security Updates & Vulnerability Management

- Addressing security-related bugs including vulnerabilities, exploits, and potential hack risks
- Timely application of security patches for CMS core, themes, and installed plugins
- Regular security audits to identify potential vulnerabilities and attack vectors
- Monitoring for malware, unauthorized access attempts, and suspicious activities
- Implementation of recommended security hardening measures (firewall rules, file permissions, login security)
- Immediate response and remediation in the event of a security breach or compromise
- SSL certificate renewal support and HTTPS compliance monitoring

2.3 Performance Optimization & Monitoring

- Periodic website speed and performance assessments using industry-standard tools

- Database optimization includes cleanup of overhead, transients, and orphaned data
- Image and asset optimization for faster page load times
- Catching configuration and optimization for improved server response
- Uptime monitoring and alerting to ensure maximum website availability
- Identification and resolution of performance bottlenecks

2.4 Backup & Recovery Support

- Configuration and management of monthly scheduled backups (files and database)
- Verification of backup integrity through periodic test restorations
- Prompt website restoration from backups in the event of data loss, corruption, or accidental deletion
- Monthly backup storage management and housekeeping

2.5 Compatibility Maintenance

- CMS core updates with pre-update compatibility testing and staging validation
- Plugin/extension updates with thorough testing for conflicts and regressions
- Version compatibility checks and migration support as hosting environments evolve
- Cross-browser compatibility testing to ensure consistent rendering on Chrome, Firefox, Safari, and Edge
- Mobile responsiveness verification following any updates or changes
- Theme compatibility maintenance with CMS and extension updates

2.6 Training & Onboarding Support

- CMS usage training for client staff including content management, page editing, and media uploads
- Onboarding sessions for new team members on website administration and workflows
- Guidance documentation and walkthrough materials for common administrative tasks
- Periodic refresher sessions as needed following major CMS or extension updates
- Assistance with user role management and access control configuration

2.7 Support Process & Response Timelines

All support requests must be submitted through the designated support channel (email or phone). Each request will be acknowledged, triaged, and assigned a priority level based on its impact and urgency. The following Service Level Agreement (SLA) applies:

Priority	Description	Response Time	Resolution Target
Critical	Website down / major functionality broken	Within 2 Hours	4–8 Hours
High	Significant feature malfunction	Within 4 Hours	1 Business Day

Medium	Minor bugs or display issues	Within 8 Hours	2–3 Business Days
Low	General queries or minor tweaks	Within 24 Hours	5 Business Days

Note: Response times are applicable during standard support hours (Monday to Friday, 9:00 AM – 7:00 PM IST). Critical issues reported outside support hours will be addressed within the same day itself with highest priority.

3. EXCLUSIONS

To maintain clarity and set accurate expectations, the following activities and services are explicitly excluded from the scope of this AMC. Any requirement falling under these categories will be treated as a new project or change request and will be subject to separate scoping:

- Development of new features, modules, or functionalities not currently present on the website
- UI/UX redesign, layout changes, or visual overhaul of existing pages or sections
- Migration of the website to a new hosting provider, server, or domain
- Integration with third-party systems, APIs, payment gateways, or external platforms not currently in use
- Content creation, content writing, graphic design, or multimedia production
- Development of mobile applications or standalone web applications
- Hardware, hosting, domain registration, or third-party software/plugin license costs

Should any excluded service be required during the contract period, UpBuff will provide a detailed scope document, timeline, and cost estimate for the client's review and approval before commencing work.

4. BENEFITS OF THE AMC

4.1 Proactive Issue Prevention

Regular monitoring and timely updates significantly reduce the risk of unexpected downtime, security breaches, and performance degradation.

4.2 Dedicated Support Access

Priority access to a skilled technical team ensures that issues are resolved quickly, minimizing business disruption.

4.3 Cost Predictability

A fixed annual investment eliminates the uncertainty of ad-hoc billing, making IT budget planning straightforward and predictable.

4.4 Enhanced Security Posture

Continuous vulnerability management and security hardening protect your brand reputation and customer data.

4.5 Optimized Performance

Regular performance tuning ensures a fast, responsive website that enhances user experience and supports search engine visibility.

4.6 Business Continuity

Robust backup and recovery mechanisms provide peace of mind, ensuring rapid restoration in the event of any unforeseen incident.

5. COMMERCIAL TERMS

Service	Website Support & Maintenance (AMC)
Contract Duration	12 Months from the date of execution
AMC Value	₹1,20,000/- per annum, exclusive of applicable taxes
Payment Terms	100% payable at the time of AMC commencement
Support Hours	Monday to Friday, 9:00 AM – 7:00 PM IST
Support Channel	Email / Phone

Proposal Validity

This proposal is valid for a period of 30 days from the date of issue (February 09, 2026). Post the validity period, the terms and pricing may be subject to revision.

Renewal

This Agreement shall remain in effect for a period of one year from the commencement date. It shall automatically renew for a subsequent term unless either Party provides the other with a written notice of non-renewal at least thirty (30) days prior to the expiration of the current term. Upon receipt of such notice, the Agreement will conclude at the end of the existing period without further obligation.

6. Agreed and Accepted
